About the Authors & Taxcafe

Carl Bayley is the author of a series of Taxcafe guides designed specifically for the layperson and the non-specialist. Carl's particular speciality is his ability to take the weird, complex and inexplicable world of taxation and set it out in the kind of clear, straightforward language taxpayers themselves can understand. As he often says himself, "My job is to translate 'tax' into English."

In addition to being a recognised author, Carl has often spoken on taxation on radio and television, including the BBC's It's Your Money programme and the Jeremy Vine Show on Radio 2.

A chartered accountant by training, Carl is a former chairman of the Tax Faculty of the Institute of Chartered Accountants in England and Wales. In June 2023, he stepped down after almost twenty years on the institute's governing council.

Nick Braun founded Taxcafe.co.uk in 1999 along with Aileen Smith. As the driving force behind the company, their aim is to provide affordable plain-English tax information for private individuals and investors, business owners, accountants and other advisers.

Since then Taxcafe has become one of the best-known tax publishers in the UK and has won several business awards.

Nick has been involved in the tax publishing world since 1989 as a writer, editor and publisher. He holds a doctorate in economics from the University of Glasgow, where he was awarded the prestigious William Glen Scholarship and later became a research fellow. Prior to that, he graduated with distinction from the University of South Africa, the country's oldest university, earning the highest results in economics in the university's history.

Contents

Introduction **1**

Chapter 1 Why Put It Through the Company? **6**
1.1 Win Win Win! 6
1.2 What Does 'Putting It Through' Mean? 7
1.3 Is it Always a Good Idea? 8
1.4 Who Are You to Decide? 10
1.5 Non-Tax Factors 11
1.6 A Quick Note on Furnished Holiday Lets 12
1.7 Greater Scrutiny of Directors' Transactions 12

Chapter 2 Understanding Company Tax Deductions **14**
2.1 How Much are Company Tax Deductions Worth? 14
2.2 Deducting Company Expenses 15
2.3 Apportioning Expenditure 24
2.4 Statutory Exclusions 27
2.5 Tax Returns and Amendments 28
2.6 Accounting Periods 29
2.7 Losses: Can You Go Too Far? 30

Chapter 3 Claiming Back VAT **33**
3.1 Recovering VAT 33
3.2 Should You Register for VAT? 35
3.3 Extra Claims on Registration 37
3.4 Do You Need a VAT Invoice? 38
3.5 Employee Benefits 41
3.6 Business Entertaining and Gifts 43
3.7 The Flat Rate Scheme 44
3.8 Interaction with Corporation Tax 50

Chapter 4 Director's Expenses **52**
4.1 What are Director's Expenses? 52
4.2 What are Not Director's Expenses? 55
4.3 What if You Get it Wrong? 56
4.4 Business Travel 59
4.5 Subsistence Costs 64
4.6 Overseas Travel 67
4.7 Taking your Spouse or Partner 71
4.8 Entertaining and Gifts 73
4.9 Fees, Subscriptions, and Other Items 78
4.10 Pre-Trading Expenditure 79

Chapter 5 Saving Tax by Putting it Through **81**
5.1 The Biggest Saving: Income Tax 81
5.2 Saving Tax by Paying Yourself 83
5.3 Tax-Free Dividends 84
5.4 Tax-Free or Tax-Efficient Interest 84
5.5 Making the Most of Your Director's Loan Account 87

Chapter 6 Employing People **90**
6.1 Salaries and Wages 90
6.2 Employer's National Insurance 92
6.3 Auto-Enrolment Pensions 100
6.4 Paying Directors 105
6.5 Paying Family 109

Chapter 7 Tax-Free Benefits **113**
7.1 The Benefits of Benefits 113
7.2 Pension Contributions 115
7.3 Pensions Advice 116
7.4 Workplace Parking 116
7.5 Late Night Taxis 117
7.6 Transport for Disabled Employees 119
7.7 Incidental Overnight Expenses 120
7.8 Bicycles 120
7.9 Work Buses 122
7.10 Mobile Phones 122
7.11 Equipment and Supplies Used at Home 123
7.12 Medical Treatment 125
7.13 Medical Check Ups & Flu Jabs 125
7.14 Eye Tests and Glasses 126
7.15 Welfare Counselling 126
7.16 Hearing Aids & Other Equipment 127
7.17 Gyms & Sports Facilities 127
7.18 Life Insurance 128
7.19 Employees Working from Home 129
7.20 Relocation Costs 130
7.21 Job-related Accommodation 131
7.22 Childcare 131
7.23 Workplace Nurseries 132
7.24 Work Related Training 132
7.25 Retraining Costs 133
7.26 Personal Gifts 133
7.27 Gifts from Third Parties 133
7.28 Long Service Awards 134
7.29 Staff Suggestion Schemes 134
7.30 Free or Subsidised Meals 135
7.31 Christmas Parties and Other Annual Functions 137

7.32 Trivial Benefits 139
7.33 Taxable Benefits 141
7.34 PAYE Settlements 144
7.35 Mandatory Payrolling of Benefits 145

Chapter 8 Capital Expenditure 147
8.1 What is Capital Expenditure? 147
8.2 Introduction to Capital Allowances 149
8.3 What is Plant and Machinery and What Allowances Are Available? 150
8.4 The Annual Investment Allowance 151
8.5 Full Expensing 153
8.6 The 50% & 40% First Year Allowances 154
8.7 Enhanced Capital Allowances 156
8.8 Writing Down Allowances 156
8.9 Asset Disposals 158
8.10 More Points on Plant and Machinery Allowances 160
8.11 Choosing the Best Allowances 162
8.12 Allocating the Annual Investment Allowance 163
8.13 Future Changes to Capital Allowances 168

Chapter 9 Motoring 169
9.1 Vehicle VAT 169
9.2 Company Cars 170
9.3 Pool Cars 178
9.4 Using Your Own Vehicle for Business 179
9.5 Electric Cars, Electrifying Tax Breaks 181
9.6 Company Vans 185
9.7 Motorbikes 193
9.8 Motoring and the Flat Rate Scheme 195
9.9 Parking Fines 195

Chapter 10 Property 197
10.1 Business Premises 197
10.2 Is it Better to Rent or Buy? 197
10.3 Who Buys? 205
10.4 Should You Pay Yourself Rent? 216
10.5 Capital Allowances on Property 218
10.6 The Structures and Buildings Allowance 221
10.7 Working from Home 225

Chapter 11 Other Expenses **228**
11.1 Office Supplies and Equipment 228

Appendix B – Connected Persons **265**

Introduction

When we sat down to plan a new guide aimed at company owners, we discussed what it was people running a company most wanted to know. "Well," I said, "what people usually ask me is what they can put through the company."

That simple observation gave us the title for our new guide, and the broad scope of what we wanted to cover. 'Putting It Through' is about the question of what you can get the company to pay for. But it's not a simple 'yes you can' or 'no you can't', because within this one overarching question lie a number of others.

Yes, there is the basic question of whether the company can pay for it, but then we also need to look at whether the company will get Corporation Tax relief, and how much; whether it can recover VAT on its purchases; and whether the payment will have Income Tax or National Insurance consequences for the company owner themselves, or a National Insurance cost to the company.

When it comes to buying property, other long-term assets, or investments, we also need to think about the capital gains consequences when those assets, or the company's shares, are sold, and the impact on the company owner's Inheritance Tax burden.

We will look at all these issues and, while the original question, 'Can I put it through the company?' can nearly always be answered with, 'Yes, you can if you want,' that answer will often be followed by 'but...' and the question company owners really ought to be asking is, '***Should*** I put it through the company?' That can sometimes be a much more difficult and complicated question: but it is the question we will be answering in this guide.

This guide isn't generally about the simple, obvious stuff, like paying regular employee's wages, or the electricity bill for the company's premises. Yes, the company can pay those things, put them through its accounts and get Corporation Tax relief for the expense; and there will not usually be any tax consequences for the company owner. But most people know that already.

What we are more concerned with in this guide is the less obvious stuff, like paying wages to the company owner's children, putting part of a director's household costs through the company accounts, or dozens of other things where it is not immediately clear whether you should put it though the company, or what the tax consequences will be if you do.

In Chapter 1 we'll start by looking at some of the fabulous savings that may be available when you are able to put expenses through the company. We'll also look at what happens if you try to put the wrong thing through and how much it costs.

We then move onto the first major source of tax savings. In Chapter 2, we look at the general principles governing Corporation Tax relief for items you put through the company and cover a few quirky ideas like pantomime horses and Ferraris.

Chapter 3 moves onto the issue of recovering VAT on items put through the company. We look at some of the practicalities, potential savings and the detailed principles involved. 'Similar but different' probably sums up the contrast between Corporation Tax relief and VAT recovery and you need to know those all-important differences if you're going to get the best results.

In Chapter 4 we focus on director's expenses, all those costs you tend to incur when you're away from your workplace or through buying goods and services yourself personally. We look at how and when you can recover these costs from the company, what's included, and what to do if you get it wrong. We will also see the value of putting it through the company when you can: even when there's no Corporation Tax relief or VAT recovery.

Chapter 5 expands on this last idea by giving you a thorough understanding of how much Income Tax you can save by putting expenses through the company instead of having to pay them yourself out of after-tax income. In this chapter, we also look at the benefits of putting your own income through the company: salary, dividends, and interest. There are important savings to be made as sometimes these items can be paid to you at no tax cost, or even with an overall tax saving.

In Chapter 6, we start to look at some more specific areas, with a focus on the tax costs involved in employing people and how to minimise them, or even, in some cases, how to maximise the savings. We'll also see how employing your children could keep you, them, and the company accountant all happy at the same time.

As well as wages and salaries, there are a host of useful tax-efficient benefits that can help to both keep staff happy and keep your payroll costs down, and we look at these in Chapter 7. Often you can benefit too. Everything from mobile phones to buying pizzas for your staff, or sending the receptionist to the local cafe so the rest of you can have a tax-free lunch on the company, is covered.

Next, in Chapter 8, we look at tax relief for capital expenditure on machinery, equipment, computers, furniture… you name it. There is a dazzling array of allowances available to companies at present, and we navigate you through the maze to show you how to get the best tax savings for your company.

Chapter 9 looks at motoring and shows you what you can claim back on vehicles you put through the company, and what it costs in benefit in kind charges. In some cases, the overall cost of a company vehicle in tax terms can be horrendous, but in other cases the savings are astounding.

Plus, there are details on exactly what you and your employees can claim back from the company and how to get the best tax relief for motoring expenses.

We move on to property in Chapter 10 with a detailed examination of some critical issues like whether to rent or buy, whether to hold the company premises personally yourself, and what you can claim if you're working from home. We also look at the property running costs you can put through the company and what tax relief is available for property expenditure like fixtures and fittings, renovations, conversions, and improvements.

In Chapter 11 we catch up with a few last, but still really important, items that you can put through the company, including arguably one of the best tax-saving strategies for small company owners: pension contributions.

Lastly, Chapter 12 covers the current Corporation Tax regime applying since April 2023 and explains why, for many small companies, putting expenses through the company now saves even more tax than before. This final chapter also includes detailed guidance on the costs and benefits of forming additional companies, deferring or accelerating tax-deductible spending, and other ways to get the best out of the Corporation Tax regime.

Once you've been through the whole guide, you should be fully armed with the information you need to know what you can put through the company and to do so with confidence. In the end, we hope you can do what we start with in our very first section: Win Win Win!

Chapter 1

Why Put It Through the Company?

1.1 WIN WIN WIN!

If you are running any kind of business through a company, it generally makes sense to put as many expenses through the company as you can. There are several potential benefits, including:

- Corporation Tax (CT) relief
- VAT recovery
- The expense does not need to be paid out of your own after-tax income

Where all three of these benefits apply, it truly is a 'win win win', and the potential savings are phenomenal.

Example
Bryce is the owner and director of MacFinnan Ltd, a VAT-registered company that faces a marginal CT rate of 26.5% (see Section 2.1). He is a higher rate taxpayer, having already taken a salary of £12,570 plus dividends of £50,000 out of the company this tax year.

Bryce now wants to buy a new computer. He will use it at home, but he will use it exclusively for business purposes. He's giving his old computer to the kids on condition they don't touch the new one.

The new computer will cost £2,500 plus VAT at 20%, a total of £3,000. If Bryce wants to make this purchase personally, he will need to take a further dividend of £4,669 out of the company so that, after paying Income Tax at 35.75%, or £1,669, he will be left with the net £3,000 he needs. So, in effect, the total cost is £4,669.

On the other hand, if the company buys the computer, the first thing it will do is recover £500 in VAT, leaving a net cost of £2,500, on which it can claim the 100% annual investment allowance (see Chapter 8). The company will thus obtain CT relief of £663 (£2,500 x 26.5%) meaning the net, after tax, cost of the computer is now just £1,837.

A cost of £1,837, instead of £4,669, the difference is astounding! That's a saving of £2,832, made up as follows:

Income Tax avoided	£1,669
VAT recovered	£500
Corporation Tax relief	£663
Total	£2,832

As we can see, by far the largest part of this saving is the Income Tax Bryce has avoided by getting the company to buy the computer. This means that, while the other savings are important, it is the simple fact that the company has borne the cost that produces the greatest benefit. We will see this principle in action many times throughout this guide.

Bryce's position is fairly typical for a small company owner, but the amount of Income Tax avoided by getting the company to pay will vary from one person to another, so we will take a more detailed look at this element of the savings arising in Section 5.1.

At this stage you may be tempted to think it might be a good idea to put absolutely everything through the company, but that's not the case and, in Section 1.3 we will look at some of the potential pitfalls to be wary of, as well as the potential cost of putting the wrong thing through the company.

In Bryce's case, there was no benefit in kind charge because he fell within the exemption for home office equipment (Section 7.11).

Bryce's example also demonstrates a simple, but important principle regarding the interaction between VAT and CT. Where the company recovers the VAT on goods or services, it only claims CT relief on the net cost before VAT (£2,500 in this example, rather than the gross cost including VAT of £3,000). Hopefully this is a fairly obvious point, but we will look at it in more detail in Section 3.8.

In many cases, all the benefits enjoyed by Bryce will apply where an expense is put through the company. In other cases, it may only be one or two of them. Nonetheless, as we will see later, it is often still worth putting the expense through the company.

1.2 WHAT DOES 'PUTTING IT THROUGH' MEAN?

Putting something through the company ultimately means the company is bearing the cost, assuming the liability, or recognising the expenditure in its accounts.

The exact way this is done can be important for a number of issues including Income Tax and National Insurance on any potential benefit in kind, and VAT recovery. The key point in many cases is whether the company or the

director incurred the liability in the first place. Generally (though not always) this in turn depends on who the bill was issued to.

However, subject to these points, an expense can be put through the company in a number of ways, including:

- The company pays the expense
- The director pays the expense and the company reimburses them in cash
- The director pays the expense and the company reimburses them via a credit posted to their director's loan account (Section 5.5)
- The company recognises the expense in its accounts and pays the director in cash
- The company recognises the expense in its accounts and pays the director via a credit posted to their director's loan account

Not all of these methods are appropriate in all cases, but we will see examples of each of them in this guide.

1.3 IS IT ALWAYS A GOOD IDEA?

No, not always: there are occasions when putting something through the company can backfire. This can happen for a number of reasons, including long-term issues like future capital gains on property and other assets, and the eventual impact on your Inheritance Tax burden. We will look at these issues in Chapter 10.

But the main pitfall to watch out for is the risk of creating a taxable benefit in kind. You could actually put nearly anything you like through the company, but if it creates a taxable benefit in kind, it will often end up costing you more than simply paying the expense yourself.

Example
Lucinda decides to go on a world cruise. The ticket costs £8,000 and she gets her company to pay for it. It's purely a holiday; there is absolutely no business purpose behind the expenditure. Hence, it must be taxed as a benefit in kind. Lucinda has already taken a salary equal to her personal allowance, plus sufficient dividends to make her a higher rate taxpayer this year, so the benefit in kind will cost £3,600 in additional Income Tax. (The benefit itself is taxed at 20%, costing £1,600, but it also means a further £8,000 of Lucinda's dividends are taxed at 35.75% instead of 10.75%, increasing the tax on her existing dividend income by an additional £2,000: 25% x £8,000.)

The company will suffer employer's National Insurance at 15% on the benefit, costing a further £1,200, and bringing its total costs to £9,200 (£8,000 + £1,200).

To pay the extra Income Tax caused by her benefit in kind, Lucinda also has to take additional dividends of £5,603. She needs this much so that after paying Income Tax at 35.75% on ***these*** *dividends (£2,003), she is left with the £3,600 she needs to pay the tax on her benefit in kind.*

The only bit of good news in all this is that the company will get CT relief on the cost of the cruise and the National Insurance it has suffered, generating a potential saving of up to £2,438 (£9,200 x 26.5%).

Nonetheless, taking everything into account, the cost of the cruise can be summarised as follows:

Ticket price	*£8,000*
Employer's National Insurance	*£1,200*
Corporation Tax relief	*(£2,438)*
Income Tax on benefit in kind	*£1,600*
Increased tax on existing income	*£2,000*
Income Tax on additional dividends	*£2,003*
Total cost	*£12,365*

Instead of facing all this grief, Lucinda could simply have taken a dividend of £12,451 out of the company, paid the Income Tax arising at 35.75% (£4,451) and been left with the £8,000 she needed to pay for the cruise. In short, the cruise would have cost only £86 more (£12,451 instead of £12,365).

Admittedly, there is a small saving by getting the company to pay in this case, but only £86, and there is a lot of extra admin involved. That extra admin is likely to get even more burdensome in future: see Section 1.7.

And it could be much worse. I made a few assumptions here that tipped the balance in Lucinda's favour, but they would not always be guaranteed in a case like this.

Firstly, I assumed the benefit in kind did not attract employee's National Insurance. If it had, this would have led to an additional National Insurance cost of £640 (£8,000 x 8%) plus a further £356 in Income Tax on the extra £996 of dividends Lucinda would have needed to take out of the company. That would turn the £86 saving into an overall cost increase of £910 caused by getting the company to pay for the cruise.

For details of how and when you can avoid employee's National Insurance on benefits in kind, see Section 7.33.

Secondly, I assumed the cost of the cruise and related employer's National Insurance would attract CT relief. This was because I assumed the 'employee benefit override' discussed in Section 2.2 would apply. But this is not guaranteed in a case like this, as discussed further in Section 2.2.

Thirdly, I applied the maximum possible rate of CT relief (26.5%). But relief may only have been obtained at 25%, or even just 19%, meaning the overall net cost of the cruise would be higher, even when CT relief is available. With relief at 25%, there would be an overall cost increase of £52 if the company paid for the cruise; with relief at 19%, this would be £604. (See Section 2.1 for details of CT rates.)

Furthermore, if you think there may have been a VAT advantage in putting the cost of the cruise through the company, think again. There are a number of reasons why that wouldn't help in a case like this. We'll look at the main one in Section 3.5.

And none of this takes account of the cost of all that extra admin: not to mention the fact that blatantly putting director's personal costs through the company tends to attract HMRC's attention: and you don't want that!

Hence, in many cases, putting the wrong thing through the company can prove extremely costly. We will see more examples of how this can happen, and how you can mitigate the position if it does, in Section 4.3.

Generally, getting the company to pay for something that will form a taxable benefit in kind for the company owner is a bad idea. But not all benefits provided to directors have such disastrous consequences and some benefits can be worthwhile. We will look at this area of tax planning in Chapter 7.

1.4 WHO ARE YOU TO DECIDE?

One really important thing you have to understand about owning a company is that you and the company are separate legal entities. The company is not simply an extension of you. In law, it is a separate legal person, albeit an artificial one. This distinction is especially critical when we begin to consider payments from the company to its owners.

You own a company by owning shares in that company, i.e. by being a shareholder. Company share structures can be extremely complex, with multiple classes of shares, some having long, complicated names like 'Class A Redeemable Preference Shares'.

However, the majority of small private companies have a single class of shares known as 'Ordinary Shares'. In these simple cases, anyone who owns more than 50% of the shares controls the company. In this guide, we will refer to such a person as the company owner.

You may also control a company if you, together with connected persons, own more than 50% of the ordinary shares. Connected persons include your spouse, children, and certain other close relatives (see Appendix B for details).

Most small private company owners are also directors of their company and manage the company's affairs on a day-to-day basis. These company owners are often referred to as 'owner/managers', 'owner/directors', or 'shareholder/directors', as if this were a single role. For most practical purposes, this is a reasonable approach. However, when it comes to deducting expenses for tax purposes, it remains important to remember, as an owner/director or shareholder/director you have two distinctly different roles:

- As a shareholder, you own the company
- As a director, you run the company on behalf of the owners and, most critically, for the purposes of this guide, you are an employee of the company

It is your role as a director that gives you the ability to put expenses you incur personally through the company: but only if you meet the relevant criteria. This ability to deduct personal expenditure will be a major focus of this guide, beginning in Chapter 4, where we will look at the basic principles governing directors' expenses.

Sometimes an individual who controls a company on a day-to-day basis is not formally appointed as a director. Such an individual is known as a 'shadow director'. The principles covered in Chapter 4 apply equally to such a person.

Directors' expenses can effectively be regarded as a sub-category of company expenses. Hence, before we look at directors' expenses, we need to look at the principles governing the deductibility of company expenses. In Chapter 2 we will look at deductions for CT purposes, in Chapter 3 we consider VAT.

1.5 NON-TAX FACTORS

There are often non-tax factors to consider when deciding whether to put something through your company. These are generally beyond the scope of this guide, but one thing we thought worth mentioning is consumer rights. The Consumer Rights Act 2015 gives individuals the right to ask for a full refund within 30 days of buying a product that turns out to be faulty. This includes major items like cars (new or used) but the protection only extends to individuals, not companies.

It may be possible to change the terms of a purchase contract to include the same protection as the Consumer Rights Act, although we suspect many sellers (e.g. car dealers) may not be prepared to do this.

So, when buying through the company, it's *caveat emptor*: buyer beware!

1.6 A QUICK NOTE ON FURNISHED HOLIDAY LETS

Prior to April 2025, furnished holiday lets meeting specific criteria enjoyed a special, beneficial tax regime. This special regime impacted the CT treatment of furnished holiday letting businesses run by a company, although only to a limited extent. The main point, as we shall see in Section 10.5, being that capital allowances were available on furniture, equipment, and other qualifying assets within a dwelling qualifying as a furnished holiday let: *but only where the expenditure was incurred before 1st April 2025*.

The regime had a more significant impact on the *owners* of companies carrying on a furnished holiday letting business, as it could affect the Capital Gains Tax (CGT) treatment of their company shares, or a property they held personally used in the company's business.

This beneficial tax regime has been abolished from 6th April 2025 for Income Tax and CGT purposes, and from 1st April 2025 for CT purposes although it could, of course, still affect company accounting periods that started before 1st April 2025.

Transitional rules mean some CGT reliefs may still be available for owners of companies formerly carrying on a furnished holiday letting business on a disposal of their shares, or a property held personally and used in that business. These are beyond the scope of this guide.

For full details of the changes, including the transitional rules, see the Taxcafe guide *Furnished Holiday Lets: Big Tax Changes Ahead*.

1.7 GREATER SCRUTINY OF DIRECTORS' TRANSACTIONS

From 2025/26 onwards, most small company directors are required to report dividends received from their own company separately to other dividends. Ominously, the dividends from their own company now have to be included in the employment section of the tax return.

This new requirement applies to director/shareholders of 'close companies'. Most family and small owner-managed companies are close companies. Broadly speaking, a company is a close company if it is under the control of five people or less. Control is generally deemed to exist where more than 50% of the company's shares are held. For this purpose, shares held by an individual's connected persons (Appendix B) must be treated as if held by the individual themselves. A company where all the shareholders are directors is also a close company.

As well as the amount of dividends received from the company during the tax year, the director must also report:

- The name of the company
- Its company registration number
- The percentage of the share capital that they own in the company

HMRC has also recently consulted on proposals to introduce further reporting requirements for transactions between close companies and their directors.

This may result in companies having to report the date, amount, and recipient of each individual transaction with directors, as well as identifying the recipient with their NI number and unique taxpayer reference: that's the ten digit code you will see on your tax return, often referred to as your UTR.

Big Brother is not only watching, he's getting ready to put small company directors under the microscope. Watch this space for further developments as our dystopian future unfolds.
